## The new 3D Scanner

Providing our patients, the very best!

At Finesse Dental we only seek to provide the best and most comfortable treatment for our patients. Our new scanner is a high-tech device that simplifies dental inlay and crown procedures, by providing design information for making crowns, caps and even larger fillings. The use of our advanced technology such as the TRIOS 3D will ensure better restoration fits and minimal grinding, reducing number of appointments and overall 'chair time' for you.

### TRIOS® reinvents impression taking

TRIOS® now includes digital impression taking, teeth shade measurement and a high definition camera — all packed into a single handheld device.

#### Benefits of impression taking for our patients:

- Less grinding and during seating
- Improved accuracy and clinical results
- Reduced need for retakes
- digital impressions- no impression materials or mess
- less treatment time

#### Benefits of the 3D scanner:

- Up to 1000 3D pictures (real colour scan) for true geometries
- Spray free for optimal accuracy and comfort
- Designed for high speed impression capture
- Faster, simpler and more comfortable for patients!
