

With Easter right around the corner here at Finesse Dental we would like to wish you a safe and Happy Easter with you

While its an exciting time for children, Easter egg hunts and their sugary surprises can spell disaster for teeth. So how can you make sure you protect your children's teeth without ruining their fun?

EGG-CELLENT TIPS TO KEEP CLEAN SAFE THIS EASTER!

- After they brush their teeth encourage children to spit not rinse out allowing the fluoride to be effective rather than rinsing the fluoride from the toothpaste out.
- Drink a glass of tap water after eating your Easter eggs. This helps to wash away the sugars that create acids and cause decay. The fluoride found in tap water also helps protect your teeth.
- Brush your teeth with toothpaste Morning and night and get your teeth cleaned every 6 months by your local dentist!
