

Finesse Dental

Exceptional smile with Exceptional Care

Are your teeth discoloured or stained?

We can get your teeth the whitest and brightest they can possibly be, using the latest tooth whitening technology – ZOOM!

What is ZOOM?

Tooth discolouration can occur for a number of reasons including smoking, certain foods and drinks, illnesses, and some medications. The Zoom Whitening System is a revolutionary and most advanced in-chair tooth whitening procedure. It's safe, simple, painless, effective and very fast! In just over an hour, your teeth will be dramatically whiter. At Finesse Dental, our dentists have been specially trained to diagnose the source of your tooth discolouration to determine what treatment plan will be more beneficial for you.

How does ZOOM work?

- Prior to your Zoom Teeth Whitening in-chair procedure, regular teeth cleaning is generally recommended.
- It begins with a short preparation to isolate your lips and gums.
- The ZOOM Whitening gel is then applied which is activated by a specially designed light. The ZOOM gel is scientifically formulated that, when activated by the ZOOM light, gently penetrates the teeth to remove deep stains and discoloration.
- A five-minute fluoride treatment completes the procedure.

You'll be amazed with the results! ZOOM is guaranteed to whiten your teeth between two to eight shades, giving you that smile that you always wanted!!

ZOOM at Finesse Dental:

At Finesse Dental, we have a special offer of \$550 (normally \$1200) for ZOOM teeth whitening. Book your ZOOM teeth whitening NOW and get that brighter, whiter and healthier smile you've been wanting!
